2016 LINEUP

ALUMINUM, FIBERGLASS AND JON BOATS

*Every day, we focus
on putting our
passion and expertise
into every fishing boat
we make.*

Living Our Passion

They say that if you turn your passion into your career, you'll never work another day in your life.

At Lund Boats, we've turned our passion for fishing into a way of life. You might even say that our passion for fishing is in our blood, an essential building block in our DNA. It's at the core of what we do, day in and day out, and it defines who we are. Because we're fishermen and women ourselves, we understand our customers' passion for angling. We are driven by that passion, and put it into each and every boat we make.

We understand the passion that comes from years spent in the boat, fishing with parents and grandparents, and then passing that deep appreciation for the outdoors on to future generations. We know the anticipation that precedes the next fishing trip. The excitement as it unfolds. The treasured memories recalled days, weeks, months and years afterward. The close camaraderie that develops between fishing buddies of all ages, young and old, united by their common love for the sport.

That's where our passion for excellence originates. From our dealers to our veteran Pro Staff to our employees who put their heart and soul into their efforts every day, the Lund family puts everything we have into our products, and lays it all out there on the water for everyone to see, appreciate and enjoy. Take, for instance, our new 2175 and 2075 Pro-Vs and our new 1875 Pro-V Bass/XS. These models offer improved comfort and fishing features that will make your time on the water more enjoyable and successful. Read more on page 6 of the magazine.

To us, the Lund family extends beyond the folks at the company. It's much bigger than that. It's everyone who touches a Lund boat, whether they fish for pleasure or professionally, are weekend warriors or everyday anglers. The way we see it, we hold our family reunions on the water. Just look around. Chances are you'll spot at least a few relatives fishing nearby—and you might even find some inspiration. Learn about Jarrett Edwards, a cancer survivor who used fishing to get through his battle (page 20) and Billy Rosner, a guide who got engaged to his fiancée on a Lund (page 8).

At Lund, we don't have to say that a bad day of fishing is better than a good day at work. Because every day, we focus on putting our passion and expertise into every fishing boat we make. That's not a job; it's a lifestyle.

LUND

FEATURES

08 **Lake of the Sunset Glow**

A guide who has helped people catch fish all around the world finds his natural home on Minnesota's Lake Vermilion.

14 **The Land of Lund & Abundance**

Ontario's Sunset Country contains hundreds of thousands of lakes, plenty of first-rate resorts and fleets of Lunds to get on the many species of fish.

20 **Paying it Forward**

The host of a popular fishing show beats the cancer odds with a love for Lund and fishing by his side.

DEPARTMENTS

02 **First Cast**

Lund's brand-new 1600 Rebel makes an ideal starter boat or a straight-forward rig for veteran anglers.

06 **Legendary Lund**

Three new Pro-Vs take the Lund lineup by storm, offering the best fishing amenities, maximum onboard space and incredible power.

On the cover:

Anglers reel one in onboard the 1875 Pro-V.

FIRST CAST

Gear, news and ideas to deliver the ultimate fishing experience.

LUND

Right-Sized Rebel

A brand-new addition to the Lund lineup, the 1600 Rebel delivers so much more than meets the eye. The spacious bow casting platform conceals deep storage compartments and an 11-gallon, 35-inch livewell. A slide-out battery tray and fuel tank hider frees up more onboard space, and side rod storage cleanly hides your favorite rods when you're cruising to and from your favorite fishing cove. Available in a side console or tiller format, the 1600 Rebel is ideal for new anglers who want something simpler, but that still contains the superior fishing features to keep seasoned veterans on top of their game. **Turn to page 34 of the catalog to learn more about the new 1600 Rebel, and read tips for first-time boat buyers on the next page.**

First Time's A CHARM

THE IDEAL ADDITIVE

Make sure your Lund remains in prime condition over the winter months. ValvTect Ethanol Gasoline Treatment (VEGA) is specially formulated for marine engines and is proven to be the best solution for winterizing pure gasoline or ethanol-blended gasoline. VEGA provides stabilization for up to one year or more, prevents corrosion of internal engine components and helps prevent phase separation.

To prove total performance of VEGA, ValvTect Petroleum authorized a series of independent laboratory tests at one of the nation's leading petroleum laboratories. VEGA was found to improve the stability of E10 (90% gasoline; 10% ethanol) by 186 percent. It received a perfect A rating in corrosion prevention and showed the ability to help prevent phase separation during winter storage. For more information, visit valvtect.com.

Owning your first boat is an exciting step. Fishing outings become more personal, with the memories created onboard becoming inextricably linked to the vessel you call your own. Lund Pro Staff member Chad Schilling offers his advice for first-time buyers. Visit your local Lund dealer anytime for further support. Chad advises:

- 1. Bigger isn't always better.** Though tournament anglers and more serious fishermen often choose larger and more loaded-up boats, smaller boats have many unique benefits. In fact, I got my start on a Lund 16-foot Alaskan. Smaller boats launch more easily, are able to pull up to the shore for a break, and effortlessly sneak in and out of smaller inlets and coves. In a boat like the **new 1600 Rebel**, you can fish almost anywhere, anytime.
- 2. Look for value.** Though you have visions of fishing 365 days a year, the reality will likely be far fewer than that. A boat within your price range will be a better investment. The return on a smaller boat is amazing, and they really hold their value.
- 3. Consider several external factors.** How far you are from the water, how much space you have in your garage and what kind of tow vehicle you own play a huge role in the purchasing process. Almost any size car can trailer the 1600 Rebel, which is a big convenience for families.
- 4. Seek out comfort.** Lund has put so much time and effort into making all their boats—even the smaller ones—extremely comfortable. You want to be able to relax when you fish, so comfort is key.
- 5. Choose a boat you can learn from.** A first boat can teach anglers more flexibility. You'll learn to drift, to backroll and to cast from the bow. It's very educational. You'll fish the most effectively, the way you were meant to.

PROTECT YOUR PRIZED POSSESSION

Whether you've spent years investing in your fishing game or you're just getting started, ensure your boat and equipment are protected so you can embark on every future outing with complete peace of mind. Boater's Choice, a trusted provider of comprehensive boat insurance for Lund owners for nearly 25 years, protects all your assets on the water, big or small.

Our knowledgeable marine underwriters have access to multiple A-rated carriers and "shop" for the best price and coverage options based on your needs. They'll provide a no-obligation quote right away and support you throughout your policy life cycle, making your customer experience as stress-free as your time on the water.

Visit boaterschoiceinsurance.com to learn more.

THE PEOPLE HAVE SPOKEN

Constructing a heavy-duty product is the first step. Ensuring it stands the test of time is the next. Earning praise from those who use it every day, however, is the real indication of a job well done. Lund's durable and reliable fishing machines have won over customers year after year, decade upon decade, resulting in another Marine Industry Customer Satisfaction Index (CSI) award from the National Marine Manufacturers Association (NMMA).

The CSI award honors boat builders whose customer-satisfaction scores, based on independent surveys of all their new boat customers, are among the best in the industry. "We're honored to be a recipient of this award for the fifth straight year," says Lund President Dirk Hyde.

"The CSI Award is not only a testament to the quality construction of our aluminum and fiberglass boats, but also a nod to our incredible dealer network and superior customer service."

EVERY BOAT NEEDS A PROTECTOR.

PROGRESSIVE

Progressive Casualty Ins. Co. & affiliates.

Serious Newcomers

Lund's four new Pro-V models are the most advanced yet to hit the water

Pedestal version shown

EXCITEMENT BUILDS EVERY TIME A NEW MODEL OR UPGRADE COMES ALONG IN THE LUND LINEUP. But when the flagship series gets a top-notch overhaul, there's extra cause for celebration. Serious anglers everywhere, get ready for some hardcore revelry. Lund's brand-new 2175 Pro-V, 2075 Pro-V, 1875 Pro-V Bass (which comes in a Bench Seat version) and 1875 Pro-V Bass XS (which comes in a Pedestal Seat version), deliver the best Lund has to offer in strength, power, maneuverability, amenities and more.

All four boats feature Lund's Advanced Water Control (AWC) in the bow deck. AWC manages the flow of water to keep compartments drier than competing boats. This means you can tackle rougher, deeper waters with added peace of mind that your most prized tools and gear stay drier and more secure within the copious onboard storage. This deep and spacious storage includes compartments in the bow and stern, and dedicated tackle tray space with room for dozens of boxes. The 1875 Pro-V Bass Bench version features shock-assist tackle tray storage for convenient access on the go, and the 2175 and 2075 come with an aft deck extension for additional tackle trays.

"It's one thing to have plentiful storage on a boat destined for serious fishing outings and tournaments, but it's quite another to be able to keep these storage spaces drier," says Dan Anonen, Lund's product manager. "With the inclusion of AWC on these new models, Lund accomplishes both goals for an unmatched experience."

You'll find dedication to serious fishing in every corner of these new boats. The 1875 Pro-V Bass models feature a 36-inch, 28-gallon aft livewell with a built-in pump-out system to help prevent the spread of invasive aquatic species. The 2175 and 2075 Pro-Vs have a 51-inch, 25-gallon aft livewell with pump-out system, and a 27-inch, 12-gallon bow livewell so you'll have plenty of room to keep every fish lively. All four models come with a built-in ruler for measuring trophy catches.

In addition to huge onboard storage and livewells, these fishing machines boast the longest rod storage in the Lund portfolio. The 2175 and 2075 come with center rod storage (five 9-foot rods, five 8-foot-6-inch rods and five 7-foot-11-inch rods) and side rod storage (10 feet on the 2175 and 9 feet on the 2075). The 1875 models have center rod storage for 15 rods up to 9 feet.

Brand-new consoles on all four models come with flush mounting of electronics for seamless navigating. Impressively broad and open bow and stern casting platforms mean maximum maneuverability and more room for your buddies. When you're jetting to and from your favorite fishing holes, comfort is key. The 1875 models come standard with a bike seat, along with long bench seating or pedestal seating, based on angler preference. The 2175 and 2075 feature a bow insulated cooler, built-in floor lighting and bow SportTrak LED lighting for those (very) early mornings and post-sunset outings.

Though these four Pro-Vs are hardcore fishing machines at heart, they aren't one-trick ponies. An optional built-in ski pylon with storage opens up the possibility of serious watersports action for days spent on the water with family and friends.

"Many anglers enjoy spending time on the water in other capacities, especially with their families along," Dan says. "The ski pylon option adds versatility to a boat that is first and foremost built for serious fishermen."

To learn more about these new models, turn to page 6 (2175/2075 Pro-V) and page 12 (1875 Pro-V Bass/XS) of the catalog.

Bench version shown

Advanced Water Control means you can tackle rougher, deeper waters with peace of mind that your tools and gear will stay drier.

— LAKE OF THE — SUNSET GLOW

A LUND PRO STAFF MEMBER AND FISHING GUIDE LIVES THE
DREAM ON MINNESOTA'S LAKE VERMILION WITH HIS 2025 IMPACT

STORY BY JENNIFER CHESAK :: PHOTOS BY ROBERT GLOVER

BILLY ROSNER, A FOURTH-GENERATION FISHING GUIDE AND LUND PRO STAFF MEMBER,

has caught many trophy walleye in his time, but he says his best catch to date is wife, Holly. That may sound overly sentimental, but Billy actually tied the engagement ring to the end of a line while they were out on the boat one day and asked, “Do you think this’ll catch anything?”

It did, of course, and Billy later celebrated with his new fiancée and future in-laws with beers while cleaning fish back at the campground. After all, as Billy and Holly like to tell it, their original intention that day was to catch dinner. “We met on a Lund, got engaged on a Lund, but got married on a paddlewheel boat down in Stillwater, Minnesota,” Billy adds.

He tells the story as he and Holly are taking friends Steve and Lori Anderson out for a day of fishing on Minnesota’s beautiful Lake Vermilion in Billy’s Lund 2025 Impact. Lake Vermilion sprawls across the state’s northeastern corner, which is called the Arrowhead Region for its pointy tip that extends into Lake Superior. The foursome is enjoying a rare Saturday off at the

start of the season before Billy will work nearly nonstop until late October.

"It's funny the path life leads you down," Billy continues. He met Holly when she and her co-workers came to northern Wisconsin to fish. He happened to be her fishing guide at the resort his grandfather owned, Sylvan Rest on Lac Vieux Desert, a lake that straddles the border of Wisconsin and Michigan's Upper Peninsula. "That's why I talk funny," Billy jokes. "I'm a Yooper."

Now Billy guides on Vermilion, a place where Holly's family used to vacation and fish. "The area reminded me of where I grew up," he says. "And it's like a mini Lake of the Woods. You can get away from stuff and just enjoy nature."

Vermilion is Latin for "red" and pays homage to the region's crimson sunsets. The Ojibwe originally named the lake *Onamuni*, meaning "Lake of the Sunset Glow." The scenery definitely draws anglers and their families to the area, but its abundant muskie, walleye,

northern pike, black crappie and smallmouth bass make the lake a world-class fishing destination.

The 2025 Impact, with plenty of room for guests and gear, is the perfect boat for Billy's business, Wild Country Guide Service. "I love all the room," Billy says. "It's so open. I can take a family of four with no problem. I am a multispecies guide, and I got all my walleye stuff, all my bass and pike stuff. I carry 20 rods and reels in that boat."

Another favorite feature is the 200-hp Mercury Verado® FourStroke. "I love it," he says. "It's a big motor, very fuel efficient, dependable and quiet. I can be running across the water at 40 mph and just talking. I can't tell it's running."

Billy also operates a Lund 1600 Alaskan with a 40-hp Merc on the Vermilion River system, which he can navigate 42 miles up into Crane Lake. The smaller boat provides guests the opportunity for some unique wilderness

"I am a multispecies guide, and I got all my walleye stuff, all my bass and pike stuff. I carry 20 rods and reels in that boat."

“He understands that guiding should be about more than just catching fish. It’s about the camaraderie and creating a good experience.”

fishing, again going after walleye, bass, pike and the occasional muskie. “I can actually push right through the beaver dams,” he says.

Guiding was a natural profession for Billy, who learned the ropes from his grandfather, father and uncle at the Wisconsin lodge. “You come up through the ranks,” he explains. “It’s like growing up on a farm. I started out cleaning cabins and boats and cleaning fish when I was about 8.”

Lund was a household name in his family—they owned many over the years in Wisconsin—and the brand has always lived up to its stalwart reputation. “The Lund boats, they’re my office,” Billy says. “They’re very dependable, and I enjoy all the comforts and making sure my customers are comfortable.”

When he started guiding, the job came easily

to Billy, who is a natural people person. Since then, he’s guided people from 11 different countries. “I enjoy teaching and helping people to catch fish and just the whole outdoor experience,” he says. “I like to show them what the area has to offer. A lot of times it’s not even about the fish. That’s just part of the equation.”

Of course, when Lori gets the first walleye hookup that afternoon, no one has any complaints. Lori is the manager at the award-winning Ludlow’s Island Resort, owned by Mark Ludlow. Billy often guides customers who stay at Ludlow’s, a place with luxurious, generously spaced cabins handcrafted by the Ludlow family. Ludlow’s has been a working resort for 76 years, and the property has been passed down through three generations since it was purchased more than a century ago.

Ludlow's is located on an island, which provides extra appeals for guests. "It's private, meaning there aren't any strangers," Mark says. "And for families, it means that kids can be free. You can't get lost on an island." Ludlow's is a full-service operation that will even filet, freeze and pack fish for guests who want to take a taste of Lake Vermilion home with them. Mark points his guests toward Billy as a guide with absolute confidence. "He's an excellent fisherman," he says. "He understands that guiding should be about more than just catching fish. It's about the camaraderie and creating a good experience."

Customers who head out with Billy are treated to a shore lunch that's practically gourmet. He mixes things up from day to day so that no one's taste buds get bored—not that they could. Some of his offerings, in addition to fresh-caught fish, include wild rice with onions and mushrooms or homemade maple syrup over potatoes. Fishing trips are just the tip of the iceberg. Billy and Holly also like to take people on nature hikes to waterfalls or lead remote canoe adventures with portages in order to make their stay in Minnesota's northwoods extra special.

Sometimes, however, it's Billy's guests who surprise him. He says he was shocked one day when a group of women still wanted to go out on the lake even though the weather was awful. "I was thinking, 'these gals are hardcore,'" he says. He took them to a bay and began setting up lines. That's when one of the women got out an urn and wanted to spread her late husband's ashes. Her husband had vacationed on Lake Vermilion in the past and had revered it as a beautiful place. Billy says he was honored to be part of the experience of carrying out the man's last wishes.

When the fishing season wraps up in the fall, Billy, who lives in Cook, Minnesota, takes time off to hunt deer and grouse. He loves to spend weekends outdoors with Holly, who is an animal nutrition specialist at Land O' Lakes Purina and grew up on a large quarter horse farm in Pine Island, Minnesota. The pair cross-country ski, horseback ride and horse around with their Alaskan malamute, Sitka.

"What I like is that every day is just so different," Billy says. "Whether it be the sunrise or what you are going to see, every day is an adventure. You don't know what you are going to see around the next bend..."

When not guiding Ludlow's guests on Lake Vermilion, Billy loves spending time on his Lund with wife, Holly, and friends Lori and Steve Anderson.

THE LAND OF LUND & ABUNDANCE

IN THIS STUNNING LAND OF PLENTY, FIRST-RATE RESORTS
AND LUND BOATS GIVE ANGLERS AN EXPERIENCE UNLIKE
ANY OTHER. STORY BY ELLI THOMPSON PURTELL

Courtesy of Grace Anne II Yacht & Lodge and Ontario Tourism

SUNSET COUNTRY, ONTARIO, IS A LAND OF TRUE ABUNDANCE.

Forget the 10,000 lakes of Minnesota (which is impressive by itself); Sunset Country boasts 100,000. The shoreline of Lake Superior may seem to span forever, but the Lake of the Woods, along with its 14,522 islands, has even more.

And then there's the fish. "The fishing opportunities are exceptional," says Gerry Cariou, executive director of Ontario's Sunset Country Travel Association. "Everyone can catch great numbers of fish, and not just any fish—trophy-size fish."

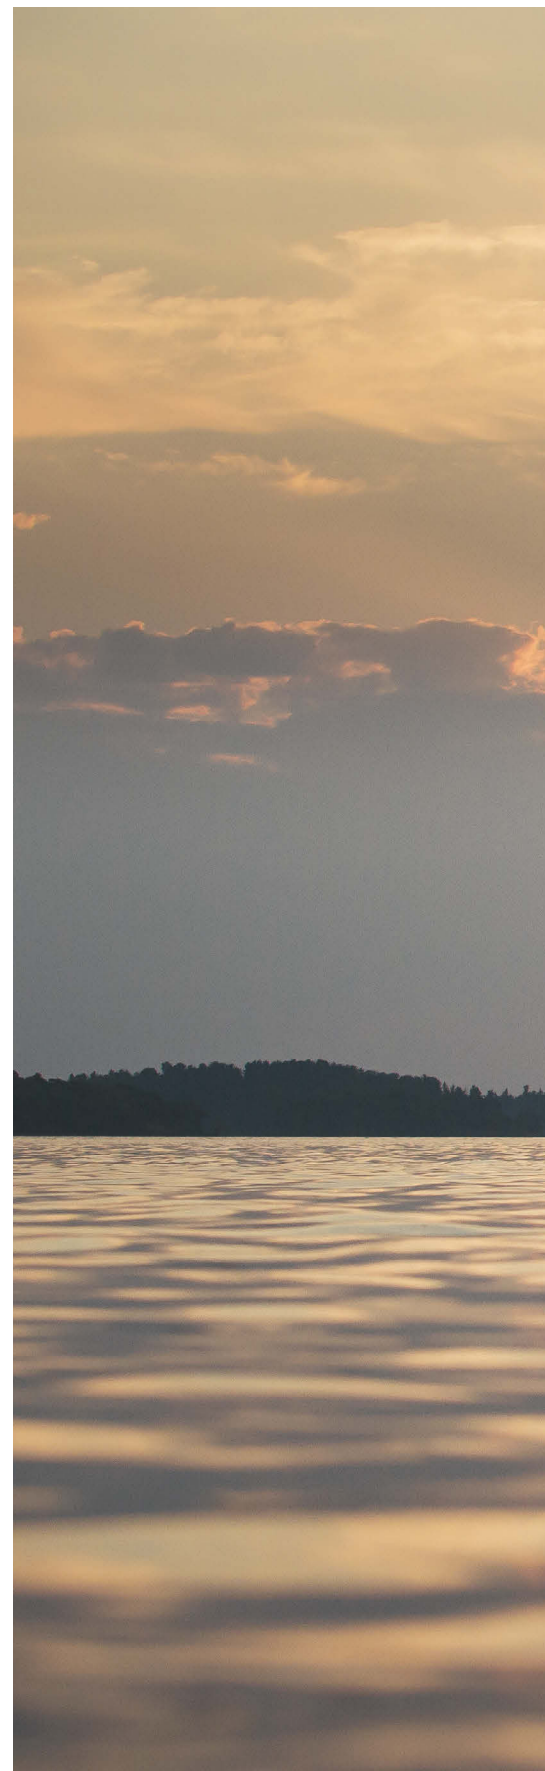

The sheer amount of fish is gamely matched by the variety of species. Fishermen can pursue walleye, northern pike, muskie, bass, lake trout, brook trout, black crappie and more. "There are few places in the world where you can find excellent fishing for as many different species of fish as you can in Sunset Country, all while fishing on very scenic, wild water," says Lund Pro Staff member Jeff Gustafson, who frequents the region.

Endless water, livewells full of fish, and natural beauty that extends to infinity in every

direction—Sunset Country is an angler's dream, and Lund lies proudly at the heart of it all, gracing the waterways of the area's dozens of fishing lodges, fly-in camps and resorts. (See page 19 for Lund's recommended resorts and camps.)

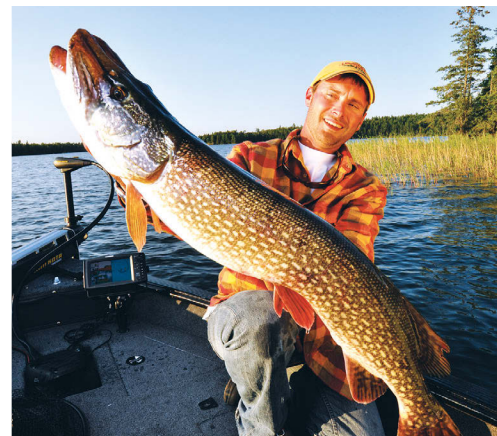

"Many of the resorts across the region choose to use Lunds because of their commitment to a quality product," Jeff says. "Many of these outfits are family-owned and into second and third generations. They stick with Lund because of the reliability they have provided for many years. For the resort owner, putting their guests in a Lund helps to enhance the fishing experience and that is a good investment for the future."

The boats' ability to stand up to the unique terrain and structure of the area provides another huge pull. Sunset Country lies on what

Courtesy of Grace Anne II Yacht & Lodge and Ontario Tourism

“Everyone can essentially have their own lake up here. The getting away, the solitude, the escape... that’s a big part of why people come here. And once we get them here, they almost always return.”

Courtesy of Grace Anne II Yacht & Lodge and Ontario Tourism

is known as the Canadian Shield, an area of exposed igneous rock that covers half of Canada, from the Arctic Ocean down to the Great Lakes. This exposed rock hides under the surface of the lakes as well, and though not a cause for alarm, resorts and fishermen alike choose Lunds to hold up to anything they might encounter.

“Lunds outlast any other boat on the market,” Jeff agrees. “You can get around safely and comfortably in any weather conditions. Some resorts use the higher end Pro Guide series while others use the bullet-proof Alaskan that can take a beating year after year.”

Though Lunds make fishing in almost any weather a possibility, most visitors head to

the region between June and August when the warm weather allows them to enjoy the breathtaking arboreal forests of pine and birch and to spot the plentiful land-based wildlife: moose, bear, wolves, eagles, deer and more.

Sunset Country’s rich outdoor history inspires a great many activities beyond fishing, from watersports to golfing, hiking, camping and ecotourism. Many of the communities across the region hold annual festivals or events in the summer that offer something for everybody. The off-season, though colder and less active, provides a quiet and serene setting for ice fishing.

For all its natural excess, Sunset Country is blessedly sparse in one respect: people. Gerry

notes that the majority of visitors to the region hail from the American Midwest and are searching for a remoteness to replace the bustling urban environments and more crowded lakes south of the border. “Everyone can essentially have their own lake up here,” Gerry says. “The getting away, the solitude, the escape... that’s a big part of why people come here. And once we get them here, they almost always return.”

Because in the end, sometimes you have to go where there’s nothing in order to find it all.

“It’s not only the quality of fishing that draws people here, but also the experience that it offers,” Gerry says. “It’s the outdoors, the beauty of nature to an extreme. It changes you a little.” 

LUND'S RECOMMENDED SUNSET COUNTRY RESORTS

Grace Anne II Yacht & Lodge

The Grace Anne II Yacht & Lodge is a luxury destination on the expansive Lake of the Woods. With no other private land on the all-inclusive resort's 7-mile island, guests will experience complete privacy and solitude during their stay. The resort's namesake is the historic *Grace Anne II*, an 85-year-old yacht that can be chartered out for overnight all-inclusive excursions (1–3 days) or evening culinary cruises. Though the resort's French chef, 10,000-bottle wine cellar and first-class amenities offer a comfortable retreat, the spectacular beauty of the outdoors will draw you out every day. Fish for gigantic walleye onboard one of the resort's Lund Boats, head to the trap range, hunt deer or goose, explore the gorgeous waterways by boat or kayak, hike the island's nature trails, take a guided nature tour, or relax in the hot tub and sauna. "The Grace Anne II Yacht & Lodge provides a truly unmatched experience," says general manager Dominique Kyle. "Ontario Tourism recently named us an Ontario Signature Experience, an elite designation of Ontario's best and most unique destinations."

graceanne.com | +1 (800) 987-3857

Paradise Cove Resort

Lund Pro Staff member Gary Roach, a.k.a Mr. Walleye, has chosen Paradise Cove for 40 years. Gary's tournament partner Duane Hell owns Paradise Cove Resort and claims this area 150 miles north of International Falls, Minnesota, has "the most beautiful scenery anywhere." Paradise Cove's waterfront cabins come with a stove, refrigerator, bathroom and up to four bedrooms. The area's five lakes offer premium muskie, walleye, bass and northern pike fishing. Guests can rent boats by the day or hire a personal guide to enhance their fishing experience. In the evening, if you don't want to fry up the day's catches, head to the resort's restaurant and lounge.

paradisecoveminaki.com | +1 (807) 224-1107

Tomahawk Resort

Tomahawk is a full-service lakeside resort that caters to anglers and their families. Guests can rent out a fully equipped houseboat or a comfortable lakeside cottage. Head out from the resort's staffed marina for a long day of fishing. Rent one of Tomahawk's new Lunds or dock your own boat in

one of the resort's safe and secure lighted slips. The Lake of the Woods' crystal-clear water and the resort's secluded sand beach invite swimming, sunbathing and canoeing. Horse-shoe pits, a grass volleyball court, a playground and a hiking trail will keep kids and adults alike busy all day long. Just a short drive from the resort are two 18-hole golf courses, miniature golf and several restaurants.

tomahawkresort.com | +1 (800) 465-1091

Reid's Birch Island Resort

A classic fly-in experience with the comfort of a five-star resort—that's the mission of Reid's Birch Island Resort, which opened in June 2013 on the Winnipeg River near Minaki, Ontario. "Anglers find themselves with less time on their hands," says owner Phil Reid. "As the business environment becomes more competitive, executives and families are less able to take off for a week at a fly-in fishing lodge along with an additional three or four days in transit. Modern anglers want shorter trips, more efficient travel, and high-level accommodation and service. And great fishing of course." Expert guides at the resort offer any assistance needed for every level or age of angler, including pointing out hotspots for walleye and preparing a shore lunch in any style you crave—traditional pan-fried, sweet and sour, stir-fried, baked or with honey mustard.

reidsbirchislandresort.com | +1 (807) 224-3471

Delaney Lake Lodge

Delaney Lake Lodge is the only lodge and private land on the gorgeous Delaney Lake in Kenora. The seven cabins on site each feature a full modern bath with all amenities, a sitting area and a screened porch. The lodge is ideal for corporate or other large group gatherings, with a huge front deck that provides stunning views of the lake and a beautiful stone fireplace for cooler nights. Delaney Lake has fantastic fishing all summer and into the fall, where views of breathtaking foliage complement the trophy fish: northern pike (including an Ontario record 42-pounder), smallmouth bass, walleye, trout and muskie. With or without a guide, fry up a shore lunch midday, and after sunset, head back to the lodge to trade stories over a home-cooked northwoods dinner.

delaneylakelodge.com | +1 (800) 401-9281

PAYING IT FORWARD

JARRETT EDWARDS WAS A YOUNG ANGLER ON THE RISE WHEN CANCER CHANGED THE COURSE OF HIS CAREER. BUT NOTHING COULD CHANGE HIS LOVE FOR FISHING. STORY BY ALEXA M. POTEET :: PHOTOS BY MIKE HEHNER

JARRETT EDWARDS MIGHT BE THE HOST AND PRODUCER OF HIS VERY OWN FISHING TV SHOW,

but his love for fishing began as simply as any other boy. When Jarrett was 4, his father, Jim, took him fishing for the first time. “My dad put a small piece of cheddar cheese on my hook,” Jarrett says, “and before I knew it, I was in the battle of my life with a carp!”

From that day on, he became a sponge for soaking up as much on-water time and angling knowledge as possible. Family lore holds that Jarrett’s first-grade teacher called Jarrett’s mother, Debbie, and recommended he be held back: He kept asking when the school bus was going to show up so he could get home and fish already. His passion for the water hasn’t wavered since.

Today, Jarrett’s very own national fishing show, *Jarrett Edwards Outdoors*, features

multispecies action in western waters near his Lake Powell, Arizona, home and beyond. The icing on the cake is his participation in more than 60 days of seminars annually, where he gets to share his love of fishing with others.

Of course, between first grade and his present gig on the small screen, Jarrett’s been rather busy. He began his national career at 21 years old, competing full-time on the Bassmaster Top 150 Trail and then the Bassmaster Elite Series. While Jarrett has experienced many unforeseen twists and turns in his fishing journey, to understand his monumental rise, it’s best to start at the beginning.

Since catching the angling bug as a young boy, Jarrett adored the idea of tournament fishing. The family moved to Southern Colorado

when Jarrett was 15 and, once there, he heard of a bass fishing club three hours away in Pueblo. Despite the cost and six hours round-trip in the truck, Jim and Debbie made sure Jarrett was at every meeting and tournament. "This meant the world to me then," Jarrett says. "But now that I'm a father, I look back at their sacrifice, both personally and financially, and am still in awe of their unconditional love and support for me." Jarrett loved the local tournaments and told his dad that he wanted to compete full-time. Jim wanted him to be sure, so he issued his son a challenge: Jarrett had to prove that he belonged in the industry. "Do something special. Get my attention," Jarrett recalls his dad saying. Never one to shy away from a difficult task, Jarrett cooked up a plan.

Armed with his fishing knowledge, he began thinking about ideal conditions for bass in Colorado. He knew Echo Canyon Lake, 7,000 feet above sea level, featured warm-water springs and rainbow trout, two crucial ingredients for growing larger bass in a cold environment. After a bit more research, Jarrett says, "I was convinced that I knew where a Colorado-state-record largemouth bass lived."

For 31 days straight, he fished Echo Canyon from the shore without luck, until on day 32, his bass arrived. "A huge rain-and-sleet storm was coming in," Jarrett says, "and the bass were feeding like crazy." That day, as just a junior in high school, he landed the new Colorado-state-record largemouth bass at 11.6 pounds, clobbering the old record by one full pound. Jarrett smiles, "I called my dad that day and told him we needed to have a serious talk."

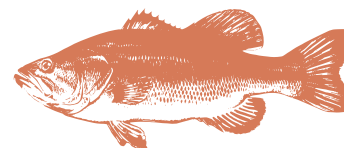

A year later, and 15 days fresh out of high school, Jarrett began competing professionally at the Bassmaster Western Open. "I remember back then feeling like I was ready for serious competition, but looking back, I had no business competing there as a professional!" He only caught one fish and took nearly last place in the event, but the finish only fueled him further to master his craft at the national level of competition. Steadily, he improved. In short time, he was competing on the Bassmaster Top 150 Trail, which ultimately led him to the revered Bassmaster Elite Series.

By the time he was 25 years old, Jarrett was at the top of his game. "It was a surreal feeling, having competed in 54 national Bassmaster events from coast to coast at that age," Jarrett says. His tournament standings and confidence

were building in-sync, until one evening when he was competing on Lake Norman in North Carolina. "I felt a strange lump on my collarbone," Jarrett says. After getting it checked out at the local emergency room, Jarrett was told that he needed surgery and that there was a possibility it was cancer. The doctor's worst fears were confirmed. Jarrett was diagnosed with stage 2B Hodgkin's Disease shortly after. Within weeks, his life transformed from that of an angling superstar to that of a seriously ill cancer patient. The reality was sobering.

After a year-long battle with lymphoma, which included numerous rounds of chemotherapy and radiation treatments, Jarrett was exhausted. "I had very little energy, not to mention my competitive drive was about gone," he

"I was convinced that I knew where a Colorado-state-record largemouth bass lived."

recalls. Extensive travel for tournaments wasn't what he yearned for anymore, but Jarrett knew he wanted to stay involved in fishing. He and his wife, Rebecca, began brainstorming, and *Jarrett Edwards Outdoors* was born.

That was 9 years ago, and Jarrett still credits his cancer with teaching him there's truly no time like the present. "The times that I could get in my boat and fish I felt that my healing was 10-fold compared to sitting at home and looking up survival stats online," Jarrett shares. "Fishing gave me a newfound appreciation of life, no longer as a job but as a way of wonderful therapy."

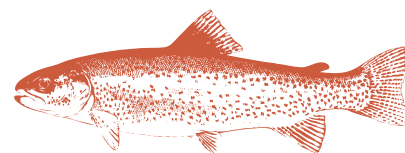

Today, Jarrett represents Lund and enjoys the boats on his fishing show and on his own time. "The first boat I ever owned was a Lund," Jarrett says. "It was purchased for me when I was 12 years old, and I can honestly say that today the boat fishes just as great as it did 23 years ago. Someday my son, Westin, will inherit the very same boat, and it will be an honor to pass it down to him." In addition to his heritage Lund, Jarrett's happy to be running the 1875 Pro-V Bass, a brand-new model. "This boat has been so well thought out and is loaded with awesome features," he says. "I'm really excited for the general public to be able to get inside this boat and see the fit and finish for themselves." (To read more about this new addition to the Lund lineup, flip to page 6 of the magazine and page 12 of the catalog.)

Jarrett's perspective on his life-changing cancer remains steadfastly positive, even today. "I have gained more from cancer than it has taken

from me," Jarrett says. "I realized how precious each and every day is." He has also found a new passion along with his love for fishing: helping others. On a monthly basis, Jarrett reaches out to newly diagnosed patients and shares his story with them. "It's very important for them to understand that this moment in their lives is temporary," Jarrett explains. "Cancer is no longer a sure death sentence. We must learn to celebrate the peaks of life and to ride out the valleys that we all face as humans. Helping others with the disease is my passion."

Jarrett's also proud to serve on the board of the Lone Survivor Foundation (LSF), which helps soldiers returning from war engage in the outdoors and begin a new chapter in their lives. To help the LSF, Jarrett traveled the country collecting signatures from soldiers, a new program he founded called Operation Outdoors USA. After securing more than 4,100 signatures from soldiers in 26 states, Jarrett proudly donated a boat to the LSF ranch where it helps soldiers get out on the water and begin to heal.

While others might have resigned themselves to letting a difficult diagnosis derail their dreams, Jarrett seems only to have grown more passionate and accomplished in the face of that struggle. "Cancer has motivated me to not wait around and play it safe in life," he says. "Through my cancer experience, I have been able to come full circle by paying it forward." For those who stand to benefit from his incredible experiences, Jarrett is certainly a worthy teacher. His example holds many lessons—both on the water and off. 

"The 1875 Pro-V Bass has been so well thought out and is loaded with awesome features. I'm really excited for the general public to be able to get inside this boat and see the fit and finish for themselves."

ALUMINUM, FIBERGLASS AND JON BOATS CATALOG

LUNO

FISHING AT ITS FINEST.

Before our boats leave the factory, before they ever touch water, we mark them with Lund's name across the side. For us, the mark isn't a matter of decoration. It's a symbol that recognizes a heritage of superior construction and unbeatable performance. Because from a distance, you might not be able to distinguish the IPS™ hull or the power strake design, but you can see four letters across the side—four letters that represent 67 years of quality craftsmanship by fishermen, for fishermen.

The next time you're in a secluded cove with a line in the water, look at that mark on the side of your boat and know you're not just in a fishing boat. You're in a Lund.

LUND

A blue Lund fishing boat with two anglers on a calm lake. The boat has a Mercury outboard motor and the Lund logo on the side. The anglers are wearing fishing gear and are holding fishing rods. The boat is reflected in the water.

Two Hulls, One Tradition

A close-up of a hand using a power tool to work on a metal surface. The tool is a die grinder or similar, and it is being used to shape or smooth a piece of metal. The metal has a series of holes or indentations along its length.

Lund's hulls are made from fiberglass and aluminum—two very different materials. But our hulls aren't defined by raw material. They're defined by tradition, quality craftsmanship and meticulous standards. Because how the boat is made is just as important as what it's made from.

Both our aluminum and fiberglass hulls are derived from the same innovative design—Lund's IPS™, IPS™2 and IPS™3 (Integrated Power Strake) technology. We've developed a construction process that incorporates the same industry-leading design into every hull that comes off the line.

Our aluminum and fiberglass hulls expand your possibilities and offer a customizable experience. We take pride knowing that whatever material you choose—whether it's the smooth and sleek fiberglass or rugged aluminum—you're still in a Lund.

FIBERGLASS

The smooth finish and sleek coloration on Lund's fiberglass boats come from precision molds developed at Lund. But beyond the distinctive fiberglass look, the molds also serve to ensure consistency in performance and durability in every fiberglass hull that comes off the line. True straightness within the composite fiberglass structure is guaranteed because the molds themselves have been optimized from the outset.

ALUMINUM

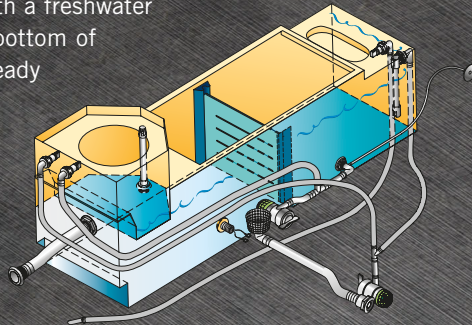

Lund's aluminum hulls aren't just built to perform at the highest level. They are built to maintain that unmatched handling through years of hard use. That starts by using the most durable raw aluminum in the industry. From there, our employees use cutting-edge shaping techniques to hand-piece together the IPS™, IPS™2 and IPS™3 hulls on every Lund. A boat may look similar in the showroom, but it's what is under the floor that makes a Lund stand apart.

A Job Well Done

Lund's pioneering work with livewells keeps your catch healthier and less prone to stress

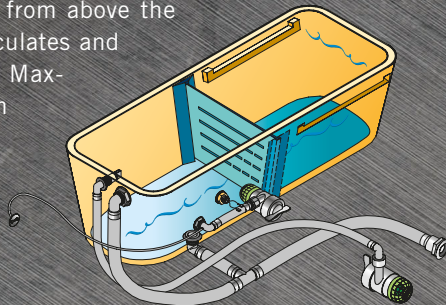

PROLONG PLUS

The envy of the industry and the most technologically advanced system to ever hit the water, the ProLong Plus is designed with a freshwater pickup integrated into the bottom of the hull, where it forces a steady flow of water into the live-well while the boat is running.

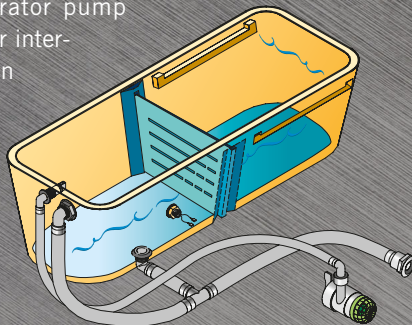

PROLONG

This two-pump design keeps water fresher and fish calmer than any other in the industry. One pump fills and aerates the well from above the fish, while the other recirculates and injects fresh air via the Max-Air system for maximum oxygenation.

AERATED

Lund's high-quality aerated livewell features a single pump with a single-switch control. You also have the option of running the aerator pump continuously in manual mode, or intermittently in automatic mode when the model is equipped with a timer.

Captain's Creature Comforts

2075/1900/1800 TYEE: COMMAND CONSOLE

The 2075/1900/1800 Tyees will amaze anglers with a fantastic set of features—for both fishing and comfort. The command console offers distinct style and an ergonomic layout where everything is closer at hand.

1750/1650 REBEL XS: HELM

Anglers have everything at their disposal when at the helm of the 1750/1650 Rebel XS. For starters, clear, easy-to-read gauges make it effortless to check fuel, tach and speed while underway. Helm toggles are right within reach, as is a spacious and protective cell-phone holder.

Smooth Operator

Sometimes you're only as good as the boat you fish in. If you can't maintain your position while fishing, your chance for hooking that fish of a lifetime decreases significantly. Thankfully, Lund boats have been meticulously engineered and constructed to deliver unmatched control that allows you to outperform the competition every time.

At the core of it all is Lund's exclusive **IPS™ (Integrated Power Strake)**, **IPS™2** and **IPS™3** hull designs. The IPS system utilizes a pronounced **center keel** that helps maintain ultimate boat control. At the back of the hull, water hits a **flat pad**, which greatly reduces churn. The non-turbulent water creates less motor strain and, ultimately, delivers better performance.

Wide **reverse chines** allow for precise cornering maneuvers and overall better control. They allow the boat to get on plane quicker and improve holeshot, as well. Finally, a **wider footprint** enhances onboard stability.

IPS integrates all of these features into a cohesive system that provides anglers with better backtrolling, superior drift control and more precise boat positioning. Simply put, Lund boats deliver a better, faster, higher, smoother and drier ride.

New 1875 Pro-V Bass shown

1 Lund Boats track like a train on rails, when trolling forward or backward, to maintain your desired position at any time. **2** Additional strakes on the IPSTM2 hull provide more control to enhance tracking ability and give you the competitive advantage. **3** Reverse chines add an additional dimension to boat control. They not only provide added stability, but also additional edges to cut water and stay on top of the fish. **4** Lund's pronounced center keel works to eliminate cross drift, making it easy to stay in complete control and reduce battery and human fatigue. **5** Lund Boats are engineered to be center balanced. This keeps the hull working at maximum efficiency for ultimate tracking control in all conditions.

The Unsinkable Ship

Lund engineers strive to design hulls that can endure the most extreme conditions. One of those extremes? A hull riddled with dozens of gaping holes—66 to be exact. The engineers gouged into the aluminum around the entire frame of their “holey” boat and launched it onto the water. The boat not only stayed afloat, it maintained stability and performance at high speeds when on plane, allowing the engineers to safely return to land with little more than damp shoes.

The secret to Lund’s superior flotation, even when taking on water, is strategically injected foam that meets and exceeds Coast Guard regulations. The buoyant material lining the inside of the hull ensures superior stability and flotation under extreme stress. For more information on Lund’s flotation compliance process and to see videos of the “holey” boat, visit www.lundboats.com.

Lund Gear

WEAR WITH PRIDE

You wouldn't be caught in any boat but a Lund while fishing your favorite waters. Now you can further look the part of a hardcore angler, thanks to Lund's extensive line of apparel. Men, women and children can sport clothing with a range of Lund logos from past to present and hats for sun protection. Show your Lund pride along with the pros by visiting www.lundboats.com and clicking on Gear.

Powerful Partners

Lund prides itself on delivering the most rugged and dependable boats in the fishing industry, so it's no surprise that Lund teams up with Mercury® Marine to provide the solid and efficient power to get you there and back. Mercury is an industry leader in four-stroke and direct-injected two-stroke technology, and all of its engines run smoothly and responsively in any water conditions. Check out Mercury's latest and greatest offerings here, and for more information, visit www.mercurymarine.com.

OPTIMAX PRO XS

Mercury's OptiMax Pro XS outboards deliver unprecedented speed and acceleration to help you get to where the fish are biting—fast! Several qualities make the Pro XS the best-selling tournament outboard in the world. For starters, its two-stage direct-injection system and high-tech carbon fiber reeds make for incredibly quick response and outstanding performance. The Pro XS also boasts higher open-throttle rpm for remarkable acceleration.

SPITFIRE PROPELLER

Mercury's FourStroke outboards have a new partner in crime: the Spitfire propeller. Four bold and uncompromising blades with high rake angles and extra cup give Mercury's FourStrokes greater acceleration without compromising top speed.

150 FOURSTROKE

The new 150 FourStroke is the lightest, most versatile and most durable outboard in its power class. Its remarkably low maintenance and top-of-the-line fuel efficiency allow fishermen (and their families) to spend more time out on the water. Sleek and reliable, the 150 FourStroke has everything you need.

BOATING'S BEST LIFETIME WARRANTY

Lund's Lifetime Limited Warranty gives you the best overall coverage available. From bow to stern, gunwale to gunwale, your new Lund is backed with a transferable* warranty—and Lund's promise that we'll make sure any claims are handled with speed, ease and our full support.

It's because Lund boats are built so well that we can afford to give you this superior warranty. We don't think you'll need it; we have that much confidence in our boats. But if you do need warranty support, you can be sure you'll have the very best in the industry.

- Lifetime Warranty on double-riveted seams (Aluminum)
- Lifetime Warranty on all plywood panels, related materials and labor (Aluminum)
- Lifetime Warranty against structural hull defects (Fiberglass)
- Three-Year 100 Percent Bow-to-Stern Parts and Labor, some exclusions apply—ask your Lund dealer for details
- Transferable*

Lund's Three-Year Material and Workmanship Warranty is transferable*—ask your Lund dealer for details.

See dealer for full warranty details; standard exclusions apply.

*Lifetime warranty on double-riveted seams, plywood panel, and structural fiberglass hull are non-transferable. Second owner receives 10-year pro-rated warranty.

HIGHER STANDARDS

Every Lund boat is built to meet or exceed rigorous NMMA certification standards and Coast Guard regulations. But first, every Lund must pass the toughest test of all—our own standards for quality and craftsmanship.

RESALE VALUE

When you buy a Lund boat, you become part of the Lund family and part of our tradition of excellence. When it comes time to sell your Lund boat, your investment in Lund quality will be rewarded.

LUND DEALERS

Because we build the best boats on the water, we can afford to be selective with who sells them. When you see the Lund sign hanging in the window, you know the dealer inside meets Lund's strict standards for customer satisfaction. Stop by any of our dealers, and you'll see why they've earned the right to carry the Lund line.

LUND PROFESSIONALS

Without the dedicated efforts of the people at Lund who build our boats and the professional anglers who help design them, the Lund tradition of excellence would not be possible. Thank you.

NOTES

Some photos of Lund boats in this catalog show factory and/or dealer installed options. Photographs are taken under controlled conditions. Colors are subject to printing limitations and are approximations only.

Because Lund is dedicated to constant product improvements, the specifications, options, color selections and model availabilities of our boats are subject to change without notification.

ProTrak™ Cover Fastening System is patented (Patent # 6,886,489)

Boat With Enhanced Access to Engine and Stern is patented (Patent # 6,935,266)

Boat With Recessed Shifter is patented (Patent # 6,971,328)

Accessory Mounting System for a boat is patent pending

SportTrak™ Accessory Mounting System for a boat is patented (Patent # 7,341,231)

SPECIAL THANKS

Auger's Pine View Resort, Lindner Media Productions, Mercury Marine, MotorGuide, Mr. Walleye Specialties, Plano Molding Company, Frabill, Gemini Sport Marketing.

Please follow the rules of safe boating, take a boating safety course, be courteous to others and respect the marine environment.
Lund, a Brunswick Company. ©2015 Lund Boat Company. Printed in the USA.

“When you talk to the consumer, there’s a tradition of ‘I remember my first Lund from fish camp,’ or ‘my dad and grandpa had a Lund.’ It’s not all about trophies and big checks. Experience new places, catch fish, go have fun!”

-Lund Pro Scott Glorvigen

SECURE CHOICE

To truly relax and enjoy your time on the water, you need to be confident that you have the right insurance. Boater's Choice is one of the most respected names in boat insurance, offering broad coverage at competitive rates. And you have our guarantee that should you have a claim, our professionals can be reached 24/7 to assist you with prompt, professional courteous service.

Exclusive Offer for Lund Owners

Boater's Choice is offering **\$10,000** worth of personal effects coverage including fishing equipment free of charge.*

* Offer available only on OneBeacon Policies. Underwriting restrictions apply.

For a no obligation quote, give us a call today.
