2025 Pre-FS® Verado® Edition

Never had a boat like this. It's the perfect boat for bigwater. Take your pick. You want simple convenience and comfort for your family, or you want all the options. Maybe you want to try a big dual console or something more conventional. No problem. We've got you covered. You can trust Lund to provide you with the best boat for your money. So take a look at our catalog and then tell your Lund dealer exactly what you want, and we'll make sure you get it just the way you want it.

Visit our online to see all the reasons why there's no other value like Lund. Stop by the showroom for a look at our 2026 lineup, read about Lund's industry-leading technology and innovation, and shop the Lund gear.

You can also check out tournament schedules, read commentary, and tips from Lund's exceptional Pro Staff. Want to know more about Lund products, check out our website, and see what the buzz is all about. Stop by today and see.

Lund backs its boats with the best warranty in the industry. Please see back cover for details.

www.lundboats.com or www.lundboats.ca
It's not just one thing that makes Lund boats better – it's everything!

The double riveting. The I-beam construction. The IPS hull. If you're done any research into aluminum boats, you know these are the things that first come to mind when you think about what separates Lund boats from all others. But the closer you look, the more reasons you'll find to buy Lund.

**Aesthetic Superiority**
- Unmatched fit and finish, from carpet installation to vinyl-wrapping.
- Boating's finest hardware, with heavy-duty durability and special features like recessed lights and dual storage compartments.
- Fully carpeted and insulated compartments, not just any smooth surfaces on a Lund.
- High-performance marine-grade paint and Marine Grade Stainless Steel, reinforced for extra styling.

**Engineering Superiority**
- Brilliant I-beam construction, with longitudinal and transverse I-beams designed for the ultimate in strength and rigidity.
- Exceptional aluminum performance, using only high-quality 5052-H134 aluminum.
- Package beam treatment in full cavities, extruded in dry environments, and vacuum tight, not just a small D-ring.
- The industry's finest in marine-grade decks and floors - reinforced for extra strength.

Lund® I-beams vs ribbed construction. Which would you trust on the water?

I-beam construction makes Lund boats more rigid and better able to endure the pounding that can break up boats built with machine-formed ribs. Lund's exclusive I-beam construction is the I-beam where they're needed – with today's most advanced engineering – to transverse stormy seas in the bow. This integrated design creates the strongest, most-united, and unyielding boats on the water – Lund boats.

Lund – The Aluminum Authority

Howard Lund pioneered aluminum fishing boat design when he founded Lund Boat Company in 1948. Today's most advanced testing affirms what Howard Lund knew:
- **Aluminum is stronger and more durable than other materials.**
- **Aluminum's high-strength-to-weight ratio offers more efficient towing and more capacity.**
- **Aluminum is more economical, and it requires less maintenance.**
- **Aluminum is also easier to tow, lighter, more fuel efficient, more durable, and it offers better handling than other materials.**

What sets Lund apart from other aluminum boat builders is our ability to get more out of the material. We build our boats in a different standard, with I-beams and double-riveted seams and sophisticated twin-plating that doesn't add excessive weight. As you compare boats, please do your own research and make sure you're comparing boats of the same class with same-class features. Do that, and you'll know which boat to buy.

If this airplane were welded, it wouldn't be flying.

Airplanes, semi-trucks, skyscrapers, and bridges are all made of aluminum in structures under enormous stress – just like boats. That's why, just like those structures, Lund boats are built with high-quality double-riveted construction to withstand the rigors of constant pounding. Double-riveted seams are absolutely the best fastening method available, whether you're traveling by air, land, or water.

Good advice before you buy a boat

**Recommendation**

- Investigate the Differences Between Routed and Welded Boats

- Learn About the Dynamics of Twin-Plating

- Realize That Riveting is Not Equal

- Compare the Strength of I-beams to Hrs

- Consider Structural Integrity

**Reasons**

- Riveting is the most durable, reliable fastening method known for high-stress applications. Lund double-rivets all seams and uses single-row riveting for other connections. We use welding only in a few strategic places, primarily as a seal where we pin two butt sections to create a single piece.

- Twin-plating beyond rivets adds extra weight that decreases overall performance. Lund twin-plates its boats from bow to bow because that's where the boat absorbs the pounding. Twin-plating beyond rivet adds weight for a feature that decreases performance.

- Quality of riveting and internal construction are what determine whether Rivets hold. Lund double-rivets its boats, and we use exclusive I-beam construction to create the most unyielding boat you can buy.

- Compared to I-beams – by any measure – the lack of necessary rigidity and cannot endure the same level of pounding.

- I-beams provide the internal backbone for frame, skylights, and Lund boats. Our exclusive marine-grade aluminum I-beams are built with today's most advanced construction method – that's why Lund boats have the best warranty and resale value.
IPS™ and IPS™ 2 – incomparable performance in an aluminum hull.

Faster, higher, smoother, drier

Lund’s introduction of IPS™ a few years ago revolutionized aluminum boat performance, and today everyone is trying to copy the IPS™ design.

But building a genuine IPS™ hull requires costly technology and unique insights into the interplay of aluminum and hull dynamics. So ask it to say that it’s a “hit” on the bottom of the hull can’t IPS™ Technology.

• IPS™ integrates and optimizes the benefits of three hull components: the power stroke, the reverse chine, and the footplate. It’s the way these three components work together that creates incredible IPS™ performance that’s greater than the sum of its parts.
• With its deeper V and additional strakes, IPS™ 2 virtually eliminates spray, creating an even smoother, drier ride, and a fitter wake.
• The IPS™ effect on overall performance is dramatic. More MPH. Faster hole shots. Panning at slow speeds. Better control. Exceptional stability at speed. Better turn economy. Faster handling of big, high-horsepower motors. And a drier, smoother ride.
• IPS™ and IPS™ 2 hulls also make back-selling easier than ever. You’ll be able to position your boat better and present your boat better — so you can get on top and stay on top.

The ultimate in fuel efficiency

The Lund IPS™ hull delivers a solid flow of water directly to the propeller, which allows the prop — and entire motor — to work with less effort. Mineralization means greater efficiency which significantly reduces fuel consumption. And because aluminum is lighter and easier to handle than other materials, full consumption is reduced further.

IPS™ 2, with the optimum number of strakes for larger Lund™ hulls, drives down more spray for the smoothest, drier ride. It’s also ideal for the largest outboards.

IPS™ 2 hull design, available on all 1800 Pro-V models, has been engineered with the ideal number of strakes for smaller-hull performance.

The original IPS™ hull is built with a wider, longer central power stroke, which feeds the propeller solid, non-turbulent water for unmatched performance.

IPS™ and IPS™ 2 hulls feature the industry’s widest chine to keep you on plane and operating at peak performance levels.

Lund IPS™ 2 footprint

Competitor footprint

A boat’s footprint is its width at the transom. The narrower the footprint, the more the boat digs into the water to give you off-plane and cause sluggish performance.

IPS™ and IPS™ 2 hulls feature the industry’s widest chine to keep you on plane and operating at peak performance levels.
In your heart of hearts, of course you want a Lund.

Innovators of fishing's greatest features

- Fish finders: Enhanced visual, easy-to-read, and powerful built-in fish finders.
- Depth sounders: Accurate, up-to-date, and reliable for accurate depth measurements.
- Rod holders: Durable, adjustable, and strong for holding multiple rods.
- Live wells: Maintains the ideal water temperature and oxygen levels for your fish.
- Electric outboards: Efficient, quiet, and powerful for smooth, silent navigation.
- Removable transom, letting you transform your boat quickly.
- Trolling motor: Lightweight, efficient, and powerful for effortless trolling.
- Hydraulic steering: Smooth, precise, and reliable for accurate control.
- Pro Transom: Strong, versatile, and durable for handling various fishing situations.
- 12 Volt electrical system: Reliable, powerful, and versatile for a wide range of amenities.
- 24 Volt electrical system: More powerful and efficient for demanding fishing situations.
- Premium Billet aluminum: Strong, lightweight, and corrosion-resistant for a long-lasting boat.
- Tiller models vs Console models: Tiller models offer easier boat and motor control, while console models provide more storage and comfort.

The Only Boat for Backtrolling

Unlike the rounded corners on fiberglass boats that allow the boat to be moved around, the Lund boats have hard corners and edges that provide better visibility and a more accurate view of your surroundings. This makes them perfect for backtrolling, allowing you to see the fish around you more clearly.

Tiller Models vs Console Models

- Tiller models are more responsive and easier to control.
- Console models offer more storage and comfort.
- Tiller models are more fuel-efficient.
- Console models are better suited for larger groups.

New Prolong Plus Livewells Keep the Water Fresher - And That's What Keeps Fish Healthy

Lund's Prolong Plus Livewells keep the water fresher by using a unique two-pump system that keeps water flowing. This helps keep the water fresh and healthy for your fish. The system is designed to maintain the ideal water temperature and oxygen levels, ensuring the fish remain healthy and active.

Number one on the leaderboard - and with the pros who get there.

There's a lot to like about Lund boats. And we asked them, 'What's your favorite thing about your Lund?' Here's what they had to say:

- #1 fishing spot: Sorensen's Summer Sports
- #2 fishing spot: Lake Huron Great Lakes
- #3 fishing spot: Lake Champlain
- #4 fishing spot: Lake Erie
- #5 fishing spot: Lake Michigan
- #6 fishing spot: Lake Superior
- #1 rod holder: Lund's Rod Holder
- #2 rod holder: Loon's Rod Holder
- #3 rod holder: Lund's Rod Holder
- #4 rod holder: Loon's Rod Holder
- #5 rod holder: Lund's Rod Holder
- #6 rod holder: Loon's Rod Holder

Your Lund boat is a perfect addition to your fishing life. Whether it's for family fun or competitive angling, the Lund boat will provide years of enjoyment. The Lund boat is not just a boat, it's a part of your fishing life.
Get on board and remind yourself why you fell in love with fishing in the first place.

There's a very short list of brands that epitomize serious fishing performance from generation to generation, and Rapala® and Lund® are at the top. And now these two fishing legends have formed a powerful alliance with one common mission — to help you catch more fish and have more fun.

How? With new Rapala® Edition Pro-V’s that reposition the concept of a body rigid boat. You'll find you go well with the best motors and electronics all at the best fish-catching times of the year. Lund Pro-V, Mr. Pike, and Pro Angler. Plus, we'll also invite you with all the Rapala® gear you'll need to boost productivity. You've never driven a truck fishing machines like this — ask your Lund dealer for details.
One-of-a-kind boats built for big water.

**Gran Sport**
- New 1990 Gran Sport
- 2100 Baron® Gran Sport
- 1990 Typer® Gran Sport
- Also available

**ITP®**
- 1990 Typer® ITP®
- 2100 Baron® and 1990 Typer® ITP®
- Also available

**Magnum**
- 2100 Baron® Magnum
- 1990 and 1990 Typer® Magnum
- Also available

**Exclusive Big Water Fishability**
You've never seen such power and convenience! Magnum® boats are built with a high back wall that prevents water from splashing over the transom and increases security when working with downriggers and trolling nets. Features include: fast flush for storage, built-in rod holders, poling platforms, optional extended decks for downriggers, and hydraulic steering.

**Ultimate Sterndrive Convenience**
Only Lund® ITP® models are designed so you can operate your main and kicker motors right from the console—a design that makes the classic ITP® packages. The ITP® design also includes an integrated motor well that maintains the boat's good looks and allows the motors to be stored for better comfort. Lund® ITP® models are available with Mercury® motor options, some including a central drain system.

**High-End Sport & Fish Performance**
Lund® Gran Sport models are built to deliver smooth, fast, easy-handling performance with the confidence to take on big water—just why they continue to be so popular. Special features include an aft ProDeck® with the-up seating that doubles as an extended aft casting platform, and an aft port for additional storage, hydraulic tiller steering, and a deep, full-width splash guard.

See pages 21 for all Sport & Fish Series specifications, features, options, and color choices.
GREATNESS IS YOURS IF YOU WANT IT. With the 1950 Tyee, you have the power to customize your boat to your exact specifications. Choose from a wide range of options, including IPS, Magnum, and Gran Sport. Read on to discover the features and benefits of each model.

IPS
- IPS provides the ultimate in performance and efficiency, featuring a powerful engine and advanced technology.
- Available in a variety of colors and styles to match your personal preferences.

Magnum
- Magnum is designed for those who demand the best of both worlds: power and style.
- With its sleek design and high-performance engine, Magnum is the perfect choice for serious fisherman.

Gran Sport
- Gran Sport combines the best of both worlds: comfort and power.
- Ideal for family outings, Gran Sport offers plenty of space for everyone to enjoy.

SPECIFICATIONS
- IPS: 300 HP
- Magnum: 350 HP
- Gran Sport: 250 HP

Fuel System
- IPS: Fuel Selecter Valve
- Magnum: Fuel Selecter Valve
- Gran Sport: Fuel Selecter Valve

Accessories
- IPS: Built-in GPS, Fish Finder, and Stereo System
- Magnum: Built-in GPS, Fish Finder, and Stereo System
- Gran Sport: Built-in GPS, Fish Finder, and Stereo System
